IR-SCAN®

Rapid solutions for the accurate characterisation of organic matter

Analyse your organic matter in a fast and reliable manner :

IR-SCAN determines the upgrading potential and market value of organic matters.

7 days instead of 30, or even 60 days.

IR-SCAN® is a **spectroscopic** analyser that provides an **identity card** for organic waste within a **few days**. This innovative method is **as accurate** as conventional biomethane potential tests(BMP).

Your advantages

- A complete analysis in **3 to 5 days** instead of 30 to 90 days in the classic method
- Methane yield
- Kinetic biodegradability
- Blocking effect
- Dry Matter (DM)
- Volatile Matter (VM)
- Carbohydrate rate, total nitrogen, lipids

IR-SCAN is dedicated to :

- Project leaders, design offices, manufacturers, banks and investors
- Operators of agricultural biogas plants and co-digestion AD plants
- Organic waste collectors, platforms and recovery centres
- Customers wanting accurate answers within a short time

BioEnTech takes care of everything : sampling kits, cool boxes, delivery to laboratory

BioEnTech

Who are we?

Our Offices : ● The company :

Founded in 2013, BioEnTech is a French company that develops, sells, and installs analytical software solutions for securing and optimizing biogas plants.

We support more than 40 units in France and abroad on different issues (increase of biogas production, organic matter reduction, OPEX control, discharge compliance ...).

To achieve the objectives of each of our clients, we do our utmost to provide human support to optimize the site.

Our partners : ○
